## What's New For Mother's Day

# Precious Pearl And Diamond Jewelry...Prized By Moms Of All Ages

This year, mothers, grandmothers, and mothers-to-be can enjoy something new in the world of fine jewelry. Glittering white diamonds and lustrous white pearls have always been the most desired gems with women everywhere.

And now, these two classic gems are being combined in elegant new jewelry designs that capture the unique beauty of each gem while uniting them in white gold or platinum jewelry with a luxuriously distinctive and fashionable appeal.

This year, you can choose from a wide variety of eye-catching pearl and diamond pendants, necklaces, bracelets, drop earrings, rings, and pins that sparkle and glow with unmatched crisp white beauty.

Or, you'll find pearl and diamond jewelry that features freshwater pearls in a rainbow of lovely pastel colors such as pink, sky blue, pale green, and peach as well as Tahitian pearls in deeper colors like peacock blue, purple, rose-red, and bronze. All of which contrast beautifully with the radiant sparkle of pure white diamonds.

So this Mother's Day, plan to give her a gift that combines any mother's best loved gems...fiery diamonds and lustrous pearls in either glowing white or exciting color.
